☐ Further documents are listed in the continuation of Box C.☐ See patent family annex.

* Special categories of cited documents:

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier application or patent published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "d" document member of the same patent family

(54) Title: SYSTEM AND METHOD FOR DEFINING LOAN PRODUCTS

(57) Abstract: A data processing system (10) for processing data regarding a plurality of different types of loan products defines the plurality of types of loan products using a plurality of attributes. The different types of loan products are defined using different combinations of the plurality of attributes and/or different values for selected ones of the plurality of attributes. The system (10) operates with a data processing (12), user systems (14), bulk data systems (16), and other data interfaces (18). The data processing system (12) further comprises user services logic (22), a transaction exchange processor (24), underwriting logic (26), acquisition logic (28), services and investor reporting logic (30), securitization logic (32), common services logic (34), a data storage system (36), and other data interfaces (38).
